

## DecoMat- RS800

Achieving outstanding  
decoration solutions.

### Application possibilities

High precision hot stamping of cylindrical, angled or non-circular plastic parts. Full surface, top or side stamping, heat transfer applications with foil as well as assembly operations or integration in complete processing lines.

### Main features

- Selection of up to 5 different hot stamping modules
- Up to 4 hot stamping modules deployed simultaneously
- Loading with pick & place or fully automatic placement robot
- Inspection system for 100% quality control
- Compact design

### Your benefit

- Highest production flexibility due to modular concept
- Simple and quick changeover to another processing combination
- Multicolor decoration in one process
- Fully automatic in- or offline operation
- Low operating costs

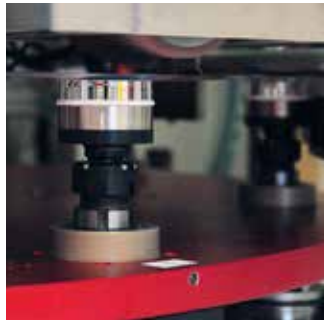

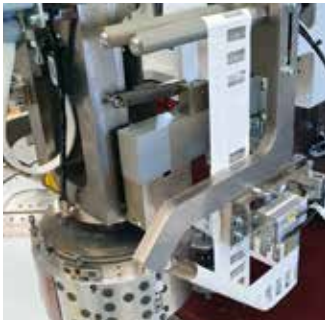

# DecoMat-RS800

Multifunctional hot stamping machine for highest flexibility.

## Technical data

<b>Speed</b>	up to 45 parts / minute
<b>Part-Ø</b>	up to 80 mm
<b>Part length/height</b>	up to 60 mm
<b>Stamping width</b>	max. 100 mm on 360°
<b>Foil roll</b>	Innen-Ø 25.4 mm
