

PMK SILICONE DISPENSER

HIGHLIGHTS

| Do-it-yourself manufacturing | |
|------------------------------------|---|
| Low initial outlay | |
| No current required | |
| Easy to use | |
| "Just-in-time" pad production | |
| No need to store printing pads | _ |
| Four pad hardnesses to choose from | |

Independence at an affordable price Cast your own printing pads quickly and easily

Want to be able to produce smaller quantities of printing pads effectively and independently? Then this is the perfect solution for you. It's low-cost to purchase and easy to use. It uses high-quality silicone materials which have been specially developed for pad printing. With the PMK SILICONE DISPENSER, you can make printing pads for any pad printing machine - whenever you need them and without waiting for delivery.

The PMK SILICONE DISPENSER consists of a

silicone cartridge with lever and mixing nozzle,

mounted on a stand. Using the lever, the

silicone is pressed through the mixing nozzle

into the pad mould. In this way, a 1:1 mix ratio

is automatically guaranteed. Immediately after

the mould is filled, the pad holding plate is

placed on the silicone material. A primer provi-

des optimum bonding between the silicone and

the holding plate. After one hour the pad can be

removed from the mould. Your silicone pad is

complete. You can use the pad for printing after

Press ...

just 24 hours.

Fill ...

Changing over made easy. Empty cartridges during pad production? No problem: thanks to the easy changeover of the cartridge, pad production can get underway again quickly.

Silicone material with the best properties

- is used to manufacture the pads:
- good antistatic properties
- very good mechanical loading capacity
- universal usability (also suitable for UV pad printing inks and screen plates)
- good swelling behaviour

Place pad holding plate on top – and you're done!

You can choose from four silicone hardnesses:

Shore-A 03: for very curved surfaces Shore-A 06: for universal areas of application Shore-A 12: for structured surfaces, flat printed parts, pad forms with small volume, flat pad forms, high printing speeds

Shore-A 18: for structured surfaces, flat printed parts, pad forms with small volume, flat pad forms, high printing speeds

| PMK SILICONE DISPENSER | Item No. | 14 51 00 |
|--|----------|----------|
| Width | | 300 mm |
| Depth | | 300 mm |
| Height | | 700 mm |
| CONSUMABLES | | |
| Replacement cartridges for pad hardness Shore-A 03, 750 ml/cartridge | Item No. | 14 51 20 |
| Replacement cartridges for pad hardness Shore-A 06, 750 ml/cartridge | Item No. | 14 51 21 |
| Replacement cartridges for pad hardness Shore-A 12, 750 ml/cartridge | Item No. | 14 51 22 |
| Replacement cartridges for pad hardness Shore-A 18, 750 ml/cartridge | Item No. | 14 51 23 |
| Replacement mixing nozzles, 10x | Item No. | 14 51 10 |
| Replacement mixing nozzles, 50x | Item No. | 14 51 11 |
| PMK primer, 90 g | Item No. | 14 50 05 |
| PMK plastic cup, 10x | Item No. | 14 50 10 |
| Brush | Item No. | 14 11 07 |
| Disposable gloves, 100x | Item No. | 14 50 03 |
| Cleaning cloths, 200x | Item No. | 14 21 64 |
| Goggles | Item No. | 44 00 07 |
