

We invite you to be a
happy customer

A machine is more than just
a machine. Oftentimes, it has
a complicated construction
that at the same time must be
effective, durable and easy to
handle and install, and use as
few resources as possible.

Groenlund Machine Works
manufactures functional, prac-
tical and economic machines
in high-tech Scandinavian de-
sign. Several of our machines
are industrial classics.

Our  not only stands for
Groenlund and our many years
of experience, but also for our
good quality. Therefore we are
confident that you will also be
a satisfied Dane customer.

screen printing:
a difficult work process –
labour intensive

+

dane machines:
automating work process –
saving labour

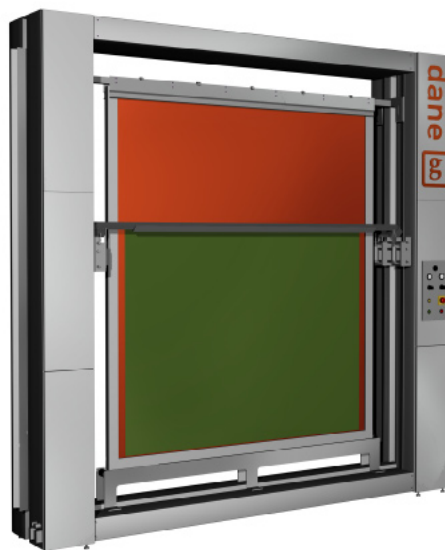

equals:
greater job satisfaction,
higher profits and
a cleaner environment

dane · coater

automatic coating in-line

The dane coater for coating quality, pure and simple

Experience

dane coater offers high quality and constantly perfect coating of screens. Based on more than 20 years of experience the dane coater is the latest arrival to the family of high-quality, reliable and efficient dane machines. It was born as an in-line machine but can be used separately. It will also be an ideal supplement to our dane-full automatic processing system.

Functions

dane coater is constructed to ensure an automated high-quality and uniform coating of screens from frame to frame. It is perfect for all types of direct emulsion. The dane coater is reliable and user-friendly. The vertical frame passage design makes it perfect for in-line use.

Operation

dane coater is an easy and practical machine to handle for the operator. The side-loading makes the loading process simple with no heavy lifts. The dane coater is easily programmed and the innovative technology with various programs provides possibilities for full-automation and for adjusting the machine to exactly fit a specified production.

Construction

The basic construction is of high-grade stainless steel and the machine can be produced in various sizes to match your exact specifications. It complies with contemporary standards and uses the latest PLC technology. The machine is manufactured according to CEN NORM 1010-1/2 and is CE-marked.

Economy

Our dane coater secures the lowest possible consumption of electricity that combined with a minimum of service and maintenance ensures a good economy and a fast return on investment.

If you want a coater of a unique high quality at the lowest possible cost, dane coater is the perfect choice for you. Once you have chosen dane coater, we are confident that you will also be a satisfied dane customer.
