

We invite you to be a  
happy customer

A machine is more than just  
a machine. Oftentimes, it has  
a complicated construction  
that at the same time must be  
effective, durable and easy to  
handle and install, and use as  
few resources as possible.

Groenlund Machine Works  
manufactures functional, prac-  
tical and economic machines  
in high-tech Scandinavian de-  
sign. Several of our machines  
are industrial classics.

Our  not only stands for  
Groenlund and our many years  
of experience, but also for our  
good quality. Therefore we are  
confident that you will also be  
a satisfied Dane customer.

screen printing:  
a difficult work process –  
labour intensive

# dane · magazine

frame magazine

## The dane magazine an indispensable supplement

### Experience

Based on the extensive work with our wide machine range, we realized the need for a versatile high quality magazine for automating the production process of screens. This led to the construction and consequent success of the dane magazine.

### Functions

dane magazine is constructed to ensure an automated, high quality handling of frames. Thanks to our unique intelligent conveyer-belt technology the magazine can work constantly and reliably with problem-free frame handling.

### Operation

dane magazine incorporates the latest PLC technology and is an ideal supplement to a dane wash or a dane stencil to automate your production process of screens. The magazine comes in 3 versions: standard, with room air blowing through air knife system and with room air blowing and controlled heating through air knife system.

### Construction

The basic construction is manufactured of high-grade stainless steel. All other materials used in the construction are chemically all-resistant, durable and thoroughly tested. The magazine can be produced in various sizes to meet your specifications. The magazine is manufactured according to CEN NORM 1010-1/2 and is CE-marked.

### Economy

Our dane magazine secures the lowest possible consumption of electricity, and this combined with a minimum of service, maintenance and make-ready time, ensures a good economy and a fast return on investment.

If you want to automate your frame production with a high quality problem-free

Distributor:
