

We invite you to be a
happy customer

A machine is more than just
a machine. Oftentimes, it has
a complicated construction
that at the same time must be
effective, durable and easy to
handle and install, and use as
few resources as possible.

Groenlund Machine Works
manufactures functional, prac-
tical and economic machines
in high-tech Scandinavian de-
sign. Several of our machines
are industrial classics.

Our  not only stands for
Groenlund and our many years
of experience, but also for our
good quality. Therefore we are
confident that you will also be
a satisfied Dane customer.

screen printing:
a difficult work process –
labour intensive
+
dane machines:
automating work process –
saving labour

equals:
greater job satisfaction,
higher profits and
a cleaner environment

automatic wash in-line 380

High capacity automatic ink and stencil remover system

Experience

We are proud to introduce to you the latest development of our screen-cleaning unit as a successor to our field-proven SAW 320, which has reliably served the market with clean screens for more than a decade. The new dane wash 380 offers higher capacity, shorter processing time with maintained immaculate cleaning result.

Functions

dane wash 380 is a high capacity in-line ink and stencil removal system, constructed to provide perfectly cleaned screens on a minimum of space. The vertical frame passage design is a totally closed, fully automated wash in-line system. The non-clogging nozzles combined with the efficient brush system ensure a perfect cleaning result - even of the most difficult screens.

Operation

dane wash 380 is equipped with an advanced PLC unit and the large full colour touch panel gives the operator possibility for easy monitoring the washing process. The touch panel also gives access to a wide range of information, such as keeping track of chemicals, planning maintenance and the over-all status of the machine.

Construction

The basic construction is manufactured of high-grade stainless steel. All other materials used in the construction are chemically fully resistant, durable and thoroughly tested. The machine is manufactured according to CEN NORM 1010-1/2 and is CE-marked.

Environment

The design of dane wash 380 is on a strictly environmental basis and is far ahead of its time, ready and prepared to meet additional future demands. It has a totally closed system for re-circulating of ink and stencil-remover - securing an environmental-friendly climate indoor as well as outdoor.

Economy

Our washing system secures the lowest possible consumption of chemicals, water, exhaust and electricity that combined with a minimum of service and maintenance ensure a good economy and a fast return on investment.

If you want the cleanest screens, a dependable and efficient high-quality washing system and at the lowest possible cost, dane wash 380 is the perfect choice for you. Once you have chosen dane wash 380, we are confident that you
