PRINTPERFEKT S2S – Save Your Flash Cures

**CHT**  
SMART CHEMISTRY  
WITH CHARACTER.

# PRINTPERFEKT S2S

## Technology

SCREEN 2 SCREEN is making the difference! It is revolutionizing the screen printing business. Without using flash cures, printing colour after colour, it provides one reason more to switch from plastisols to water-based printing pastes.

### PRINTPERFEKT WHITE 680 FF

Opaque white underbase to create brilliant colours

## PRINTPERFEKT S2S

Transparent, ready to use paste, that doesn't require intermediate flash cures. It has been developed to print halftones as well as vector graphics in a fast and reliable way.

### PRINTPERFEKT TOPCOAT

Matte finish  
Colour enhancing

## Ecology

PVC,  
phthalate and  
formaldehyde  
free

## Saving

Flash cure units  
Energy costs  
Enhance productivity

High  
elasticity

Super soft  
hand

Perfect wash  
performance

## Screens

**White/Topcoat**  
110 - 96 mesh  
(43 - 77 thr/cm)

**Colour**  
160 - 196 mesh  
(62 - 90 thr/cm)

## Temps

**Curing**  
165 °C (330 °F)  
120 - 180 sec

**Pallets**  
85 °C (185 °F)

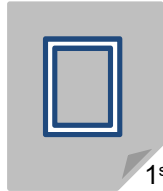

## Pigments

Up to 8 %  
COLORMATCH

## Additives

Fixing agent  
TUBASSIST  
FIX 120 W

# PRINTPERFEKT S2S

- For an 8 colour job 3 flash cures are needed
- Savings of 4 flash cures
- Smaller automatics return to action

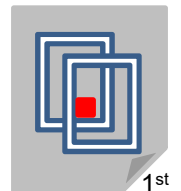

Flash

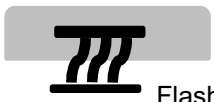

Topcoat

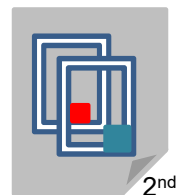

- Brilliant colours can be achieved with just one screen
- Pastes are opaque and the Topcoat creates a nice matte finish
