

VARIOPREP 3080

Mesh Preparation Concentrate 1:5

1. PROPERTIES

VARIOPREP 3080 is a water soluble, biodegradable mesh preparation concentrate developed for the manual and automatic degreasing and surface wetting of all types of mesh.

It is recommended for use before each application of direct/indirect, capillary and indirect films where a roughened mesh surface is not required. Thorough wetting of the mesh is necessary for good film adhesion. Mesh Prep **VARIOPREP 3080** is helpful, because it promotes water retention and uniform wetting.

The degreasing concentrate is not hazardous when used with reasonable standards of industrial hygiene and safe working practice. Safety and pollution related data can be obtained from the respective MSDS according to guidelines 1907/2006/EC.

2. APPLICATION

For manual use dilute

1 part of the VARIOPREP 3080 concentrate with 2 to 5 parts of water

and apply the working solution with a wet medium stiff brush from both sides, and let the screen stand for 1–2 minutes. Rinse the screen thoroughly both sides, including the inside edge of the frame and the frame corner, with cold or warm water.

Screen prepared in this way should be used latest within two hours, and rewetted just before the film adhering. While the fabric is still wet from the water rinse, proceed immediately the film transfer.

If used in automatic developing- and decoating machines, the mixing ratio depends on the type of equipment. Use in accordance with the recommendations of the machine manufacturers and SPT.

3. PACKAGING - STORAGE

VARIOPREP 3080 is packaged in standard 1, 5 L and 20 L plastic cans. The concentrate has to be stored dry and protected against frost.

Our technical advice whether spoken, written, or through test trials corresponds to our current knowledge to inform about our products and their use. It is not meant as an assurance for certain properties of the products nor their suitability for each application. You are, therefore, obliged to conduct your own tests with our supplied products to confirm their suitability for the desired process or purpose. The selection and testing of products for specific final application is exclusively your responsibility.
