Degreasing Concentrate 1:5 for Metallic Fabric

1. PROPERTIES

VARIOPREP 3101 is a water-soluble degreasing concentrate, formulated for manual application and use in automatic reclaiming machines for surface wetting, especially for stainless steel and nickel mesh.

It is recommended for use before each application of direct emulsions, direct/indirect, capillary and indirect films, where a roughened mesh surface is not required.

VARIOPREP 3101 helps to prevent pinholes by removing dust particles and imparting anti-static properties to the mesh. It greatly assists the flow and adhesion characteristics of direct emulsions.

The degreasing concentrate is not hazardous when used with reasonable standards of industrial hygiene and safe working practice. Safety and pollution related data can be obtained from the respective MSDS according to guidelines 1907/2006/EC.

2. APPLICATION

For manual use dilute

**1 part of the VARIOPREP 3101 concentrate
with 5 parts of water**

and apply the working solution with a wet medium stiff brush from both sides. Rinse the screen thoroughly both sides, including the inside edge of the frame and the frame corner, with cold or warm water.

If used in automatic developing- and decoating machines, the mixing ratio depends on the type of equipment. Use in accordance with the recommendations of the machine manufacturers and SPT.

3. PACKAGING - STORAGE

VARIOPREP 3101 is packaged in standard 1, 5 L and 20 L plastic cans. The concentrate has to be stored dry and protected against frost.
