

# VARIOCLEAN A 4523

*Screen Cleaner, biodegradable, flash point 74°C*

## 1. PROPERTIES

**VARIOCLEAN A 4523** is a low odour screen cleaner with a flash point of 74°C. The extremely effective multi-purpose solvent and wetting agent blend is developed for removing of almost all graphics, textile screen printable ink systems (solvent-, water based- and UV curing) and plastisols from screens, tools and squeegees.

The well-balanced formulation of the slow evaporating and low VOC screen wash ensures gentle treatment of all direct/indirect emulsions and capillary films as well as 2-component screen adhesives and has no negative effect on their solvent resistance when handled correctly.

**VARIOCLEAN A 4523** Cleaner Concentrate can be used in combination with the Decoater Concentrate **VARIOSTRIP A 5555** and water as so called **VARIOCLEAN A** All-in-One Chemistry for ink removing and stencil decoating in only one operation. Further information about this unique reclaiming technology you can obtain from separate leaflets.

**VARIOCLEAN A 4523** is readily biodegradable and contains no aromatic and aliphatic hydrocarbons and chlorinated solvents.

Safety and pollution related data can be obtained from the respective MSDS according to guidelines 1907/2006/EC.

## 2. APPLICATION

The **VARIOCLEAN A** All-in-One Chemistry is developed for manual application and use in special designed automatic reclaiming equipment with product-saving recirculation processing. The flash point of 74°C eliminates the need for explosion-proofed infrastructure in working areas.

The mixing ratio for **VARIOCLEAN A 4523**, **VARIOSTRIP A 5555** and water depends on the application method and type of equipment.

The working solution will not block or corrode stainless steel or polypropylene based nozzles in the automatic decoating unit. Use in accordance with the recommendations of the machine manufacturers and the **SPT**.

The **VARIOCLEAN A** working solution has an extremely long operational effectiveness and the ink and emulsion contaminated cleaner mix can be re-used by sedimentation. Detailed information regarding the possible recycling methods is stated in the relevant **SPT** and equipment manufacturer technical information.

The well trained **SPT** service technicians offer competent and customer friendly assistance, fast and reliable.

## 3. PACKAGING - STORAGE

**VARIOCLEAN A 4523** is packaged in standard 1, 5 and 20 L plastic cans plus 200 L plastic drums. The cleaner has to be stored in a dry and against frost-protected place.

Our technical advice whether spoken, written, or through test trials corresponds to our current knowledge to inform about our products and their use. It is not meant as an assurance for certain properties of the products nor their suitability for each application. You are, therefore, obliged to conduct your own tests with our supplied products to confirm their suitability for the desired process or purpose. The selection and testing of products for specific final application is exclusively your responsibility.
